

```
#include <stdio.h>

int main()
{
    int KM; float totaltoll;
    scanf("%d", &KM);
    if (KM <= 200){
        (totaltoll = KM * 1.2);
        printf("%.0f", totaltoll);
    }
    if (KM > 200){
        (totaltoll = ((200 * 1.2) + (((KM - 200) * 1.2) * 75 / 100)));
        printf("%.0f", totaltoll);
    }
}
```
