

```
#include <stdio.h>

int main()
{
    init();
    char *str = s;
    int sum = 0;
    int tmp = 0;

    for (int i = 0; str[i] != '\0'; i++)
    {
        if (str[i] >= '0' && str[i] <= '9')
        {
            tmp = tmp * 10 + str[i] - '0';
        }
        else
        {
            sum += tmp;
            tmp = 0;
        }
    }

    sum += tmp; // Add the last number (if any)

    printf("%d", sum);

    return 0;
}
```
